🔔 Opening service default/reddit-app-service in default browser...
! Because you are using a Docker driver on darwin, the terminal needs to be open to run it.
```

Reddit Comment Classifier ^{0.1} OAS 3.1

/openapi.json

Classify Reddit comments as either 1 = Remove or 0 = Do Not Remove.

default

GET / Root

POST /predict Predict

Schemas

- CommentInput > Expand all object
- HTTPValidationError > Expand all object
- PredictionOutput > Expand all object
- ValidationError > Expand all object

Reddit Comment Classifier ^{0.1} OAS 3.1

/openapi.json

Classify Reddit comments as either 1 = Remove or 0 = Do Not Remove.

default

GET / Root

POST /predict Predict

Parameters

No parameters

Request body ^{required}

application/json

```
{
  "reddit_comment": "Kubernetes rock!"
}
```

Execute Clear
